the fall and rise of french sea power explores the renewal of french naval power from the fall of france in 1940 through the first two decades of the cold war the marine nationale continued fighting after the armistice a service divided against itself the destruction of french sea power at the hands of the allies the axis and fratricidal confrontations in the colonies continued unabated until the scuttling of the vichy fleet in 1942 and yet just over twenty years after this dark day charles de gaulle announced a plan to complement the country s nuclear deterrent with a force of nuclear powered ballistic missile carrying submarines completing the rebuilding effort that followed the nadir in toulon this force provided the means to make the marine nationale a fully fledged blue water navy again ready to face the complex circumstances of the cold war an important continuum of cooperation and bitter tensions shaped naval relations between france and the anglo americans from world war ii to the cold war the rejuvenation of a fleet nearly wiped out during the hostilities was underpinned by a

succession of forced compromises often the least bad possible reluctantly accepted by french politicians and admirals but effectively leveraged in their pursuit of an independent naval policy within a strategy of alliance hugues canuel demonstrates that the renaissance of french sea power was shaped by a naval policy formulated within a strategy of alliance closely adapted to the needs of a continental state with worldwide interests this work fills a distinct void in the literature concerned with the evolution of naval affairs from world war ii to the 1960s the author drawing upon extensive research through french british american and nato archives including those made public only recently regarding the sensitive circumstances surrounding the french nuclear deterrent maps out for readers the unique path adopted in france to rebuild a blue water fleet during unprecedented circumstances

the macchi c 202 was probably the most successful italian fighter during the second world war it is generally agreed that the performance of the macchi was superior to both the hawker hurricane and the curtiss p 40 kittyhawk and on a par with the supermarine spitfire mk v it is not by chance that virtually all the italian top scoring aces flew this plane either with the regia aeronautica or the aeronautica nazionale repubblicana at the same time the mc 202 is the symbol of the dysfunctions in the italian military industrial complex the lack of sound industrial planning resulting in orders from the regia aeronautica for an exaggerated number of different aircraft the lack of the development of adequate engines limiting aircraft performance and reducing capacity to house weapons with a proper punch the corruption of politics and the culpable connivance of the high military spheres the mc 202 was therefore produced in limited numbers while there is consensus that air war especially in the african theatre would have been different had the aircraft been adopted before

melodramas as Edward Westermann reveals they point to a key but largely unappreciated aspect of the German war effort that has yet to get its full due long the neglected stepchild in studies of World War II air campaigns German flak or anti aircraft units have been frequently dismissed by American British and German historians and by veterans of the European air war as ineffective weapons that wasted valuable materiel and personnel resources desperately needed elsewhere by the Third Reich Westermann emphatically disagrees with that view and makes a convincing case for the significant contributions made by the entire range of German anti aircraft defenses during the Allied air campaigns against the Third Reich well over a million tons of bombs were dropped upon the German homeland killing nearly 300 000 civilians wounding another 780 000 and destroying more than 3 500 000 industrial and residential structures not surprisingly that aerial armageddon has inspired countless studies of both the victorious Allied bombing offensive and the ultimately doomed Luftwaffe defense of its own skies by contrast flak units have virtually been ignored despite the fact that they employed more than a million men and women were responsible for more than half of all Allied aircraft losses forced Allied bombers to fly far above high accuracy altitudes and thus allowed Germany to hold out far longer than it might have otherwise Westermann's definitive study sheds new light on every facet of the development and organization of this vital defense arm includi

the purpose of this study is to analyze the political role of the Venezuelan military from the death of Gen Juan Vicente Gomez in 1935 to the presidency of Romulo Betancourt in 1959 this analysis should contribute to a clearer understanding of the nature of military involvement in the national politics of a medium sized Latin American nation it should also serve as an additional case study for the comparative analysis of military politics in this hemisphere
